PROFESSIONAL SUMMARY

Computer Science student focused on Data Science, Machine Learning, and Deep Learning, with hands-on experience developing data analysis projects, machine learning workflows, and deep learning image classification applications. Experienced with Python, data analysis, model development, evaluation, and interactive application deployment. Seeking opportunities to apply practical machine learning and data science skills to real-world problems.

EDUCATION

BS Computer Science — University of Technology, Nowshera Expected Graduation: 2028

- **Specialization: Artificial Intelligence**

• Focused on Artificial Intelligence, Machine Learning, Deep Learning, Data Science, Computer Vision, and Python development. Developing practical skills in Python, data analysis, model development, and AI-based applications through academic and personal projects.

EXPERIENCE

Machine Learning Engineer Intern — FlyRank AI

Machine Learning Internship | 2026 | 2 Months

- **Engineered** search intelligence algorithms using an anonymized production dataset of **~30,000 pages** to optimize automated content refresh cycles.
- **Evaluated and compared** Logistic Regression, Decision Tree, and Random Forest architectures, validating Random Forest as the optimal high-precision model.
- **Executed** end-to-end data exploration, feature extraction, baseline design, and predictive data leakage checks to protect pipeline model integrity.
- **Documented** complete deployment workflows, delivering clear model interpretation metrics and strategy recommendations via readable notebooks.

TECHNICAL SKILLS

- **Programming:** Python, C++, SQL
- **Data Science:** Data Science, Pandas, NumPy, Data Cleaning, Exploratory Data Analysis, Data Visualization
- **Machine Learning:** Machine Learning, Scikit-learn, Feature Engineering, Model Evaluation
- **Deep Learning:** Deep Learning, CNNs, TensorFlow, Keras, Computer Vision, Image Classification
- **Tools:** Power BI, Streamlit, Jupyter Notebook, Git, GitHub
- **Computer Science:** OOP, DSA, Problem Solving, Critical Thinking

PROJECTS

Super Store Sales Analysis — Data Analysis

- Analyzed retail sales data to identify sales, profit, product, category, and regional performance patterns. Created visualizations and dashboards to communicate business insights.

Technologies: Python, Pandas, Data Analysis, Data Visualization, Power BI

Customer Behavior Analysis — Data Analysis

- Analyzed customer data to identify behavioral patterns and purchasing trends using data cleaning, exploratory analysis, visualization, and insight generation.

Technologies: Python, Pandas, Data Analysis, Visualization

Natural Scene Classifier — Deep Learning

- Built an image classification application that accepts an uploaded image and predicts one of seven scene classes.

Technologies: Python, Deep Learning, CNN, TensorFlow/Keras, Computer Vision, Streamlit

Multi-Disease Chest X-Ray Prediction — Deep Learning

- Developed a deep learning computer vision application for chest X-ray image analysis and multi-disease prediction with an interactive Streamlit interface.

Technologies: Python, Deep Learning, CNN, TensorFlow/Keras, Computer Vision, Streamlit

FlyRank Search Intelligence & Content Refresh — Machine Learning

- Developed a machine learning workflow using an anonymized dataset of approximately 30,000 pages. Performed feature preparation, baseline creation, model training, and evaluation; Random Forest was the best-performing tested model.

Technologies: Python, Pandas, Scikit-learn, Machine Learning, Random Forest

CERTIFICATIONS & COURSES

- Python for Everybody — University of Michigan
- Microsoft Power BI Data Analyst
